# GERIATRIC TOOTHFAIRY CERTIFIED NURSING ASSISTANT TRAINING

Sonya Dunbar Certified Nursing Assistants (CNAs) represent an essential part of the patient-care team. In assisting the medical staff, CNAs provide not only physical care for patients but also emotional and spiritual support, genuinely making a difference in the lives of patients and families.

CNAs are also the eyes and ears of the clinical staff, observing their patients carefully, and making sure the health care team knows of any changes. It is imperative now more than ever that the caregiver knows why oral care is vital and the systemic diseases linked to poor oral health. Brushing alone is not enough.

This course is designed to educate, motivate, and communicate the importance of oral care for aging adults. Sonya's course is fun, energetic, and informative for the entire team.

Each participant will be required to take a post-test and will receive a certification of completion from the Geriatric Toothfairy and American Mobile Dentistry and Teledentistry Alliance.
